

Please reject petition 04-160! I listen to satellite radio because of the lack of variety on conventional radio stations. If conventional radio stations are complaining about the competition from satellite radio, they need to produce a better product. Restricting how satellite radio competes in the marketplace is not the answer! It violates their first amendment rights, it prevents the evolution of the marketplace upon which our capitalist system depends, and is anti-consumer. Please listen to the marketplace! More and more radio listeners are switching to satellite radio and willing to pay for it because conventional radio's product is so bad. Don't make consumers suffer for the benefit of an industry that doesn't deserve protection from competition.
